

MWG Biotech Custom & High Throughput Sequencing

MWG Biotech offers you professionally automated DNA sequencing. Our custom services include: **Value Reads - High Throughput single pass, Comfort Reads - <700 bases with manual editing, Cosmid and BAC/PAC end sequencing and Publication Quality Sequencing, Genome Sequencing.** Our services also include specialist assistance and state-of-the-art laboratory equipment that guarantee optimal results with overnight turnaround. From single tube orders to large scale whole genome projects, MWG always puts YOU a result ahead!

Value Reads

- Fast overnight service, single pass sequencing
- For plasmids and PCR products
- Read lengths up to 700 bases
- Standard vector primers provided at no extra charge
- Data delivered via secure web based FTP account or email

Comfort Reads

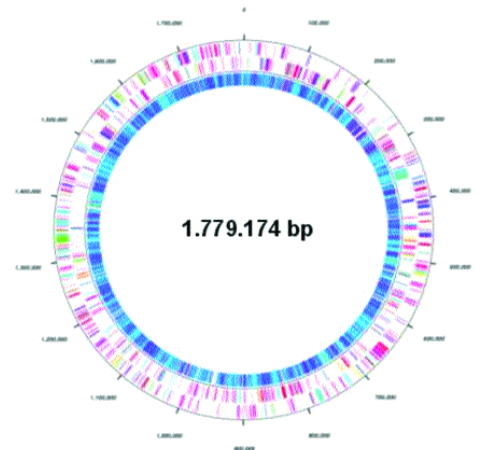

- All the Value Read services plus:
- Personalized service with manual editing of the results
- Repetition in case of failure
- Read lengths up to 700 bases
- Data delivered via e-mail, CD or web based FTP - it's your choice!

Cosmid, BAC and PAC Sequencing

- DNA preps included
- End sequencing and whole shotgun sequencing options available
- Manually edited data
- Rapid turnaround times designed to accelerate your research!

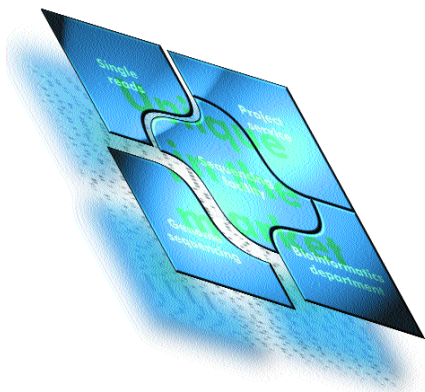

Primer Walking and Publication Quality Services

- Includes design and synthesis of specific primers
- Manually edited, aligned and assembled sequences
- Guaranteed accuracy of final data >99%

Genomic Sequencing

MWG is the complete solution for all your sequencing needs. From EST projects to whole genomes, we are right at your side. Coupled with our experienced bioinformatics capabilities, we have your whole project covered from start to finish.
